Table Of Contents

- I. Introduction: Why Do You Need A Solar Greenhouse, And What Can It Do For You?**

- II. Principles And Strategies For Energy-Efficient Thermal Transfer (TAANSTAAFL: Or, There Ain't No Such Thing As A Free Lunch)**
 - A. Glossary of Terms and Definitions**
 - B. The "Systems Nature" Of The Aquaponic Solar Greenhouse**
 - C. Incremental Benefits From The Aquaponic Solar Greenhouse**
 - D. What Is Heat And How Does It Behave?**
 - E. Thermal Mass Principles And Strategies**
 - F. Energy-Efficient Heating Strategies**
 - G. Energy-Efficient Cooling Strategies**
 - H. Combination Heating/Cooling Systems (Heat Exchangers)**
 - I. Combination Heating/Cooling/Electricity Production Systems (Solar Lamellae Heat Exchanging PV Panels)**
 - J. Short-Duration Backup Systems For Heating And Cooling**
 - K. Site Selection: What Are YOUR Heating And Cooling Resources?**

- III. The Four Climatic Conditions And Their Requirements**
 - A. Sweltering Summers, Frigid Winters**
 - B. Sweltering Summers, Warm Winters**
 - C. Warm Summers, Frigid Winters**

D. Warm Summers, Warm Winters (Everything Else)

IV. Tactics For Addressing The Four Conditions

A. Glazing Methods And Considerations

1. ETFE Film Glazing
2. Standard Poly Film Glazing
3. Double-Layer Inflated Poly Film Glazing
4. Glass Glazing: Single And Double Layer

B. Insulation

1. How Insulation Works; Types Of Insulation
2. Insulating The Aquaponics System Water Containers
3. Insulating The Greenhouse Walls
4. Insulating The Greenhouse Roof (Glazing/Insulated Glazing)
5. Insulating The Greenhouse Floor

C. Energy-Efficient Cooling Methods

1. Passive Hot Air Venting
2. Active Hot Air Venting
3. Cooling The Aquaponics System Water Using Geothermal Water Heat Exchangers
4. Cooling The Greenhouse Air Using Geothermal Air Heat Exchangers
5. Cooling The Greenhouse Air Using Water Walls/Swamp Coolers
6. Cooling The Greenhouse Using Shading Methods
7. Backup Cooling Methods For The Solar Greenhouse

D. Energy-Efficient Heating Methods

1. Heating the Aquaponics System Water Using Solar Water Heat Exchangers
2. Heating The Greenhouse Air Using Solar Air Heat Exchangers
3. Actively Heating The Aquaponics System Water/Backup Heating System (Burning Something For Heat)
4. Actively Heating The Greenhouse Air/Backup Heating System (Burning Something For Heat)

E. Combination Heating/Cooling/Electricity Production Systems

1. Combination Heating/Cooling/Electricity Production Systems (Solar Lamellae Heat Exchanging PV Panels)
2. Rare Circumstances: Unlimited Wind, Hydro, or Natural Gas On-Site

V. Electrical Use, Conservation, And Generation

A. Electricity: What It Is And How It Works

1. How Electricity Works: AC And DC And Alternate Energy
2. How To Design Your System For Your Electrical Needs
3. The AC System
4. The DC System
5. Safety Precautions: If You Have Any Doubts, GET AN ELECTRICIAN!

B. Methods For Conservation Of Electricity

1. How To Choose Electrically-Efficient Equipment
2. Timers, Programmable Timers, And Other Electrical Control Equipment
3. Backup Electrical Power Issues
4. Partial Operation: Winter Configuration/Summer Configuration

C. Generating Electricity: Alternate Energy Systems

1. The Easiest Way: Use The Grid (If You Can)
2. Small Hydro-Electric Systems
3. Electric Wind Turbines
4. PhotoVoltaic Panels (PV)
5. Combination Heating/Cooling/Electricity Production Systems (Solar Lamellae Heat Exchanging PV Panels)
6. Biogas-Powered Electricity Generation
7. Internal Combustion Backup Generators

VI. Construction Of Greenhouses

A. Modular Chinese Greenhouse

1. Pros And Cons
2. Site Prep And Foundation
3. Panel Construction Techniques And Materials
4. Curved Beam Construction Techniques And Materials
5. Moving And Storing Panels
6. Erecting Panels And Assembling Modules
7. Finishing The Greenhouse

B. Conventionally-Framed Chinese Greenhouse

1. Pros And Cons
2. Site Prep And Foundation
3. Wooden Stud Construction
4. Steel Stud Construction

C. Steel-Framed Conventional Greenhouses

1. Pros And Cons
2. What To Include In Your Purchase
3. Erection Of New Greenhouses
4. Disassembly, Transportation, and Erection Of Used Greenhouses

D. Other Types Of Greenhouses

1. Wood-Framed Greenhouses

VII. The Verticalis

A. Amicus Verticalis (Or, Friendly Verticals)

1. Philosophy And Design Process
2. Pros And Cons
3. Construction
4. Operation
