Electronic Files will be downloaded to you from Dropbox.com when you purchase this course, either the “live” or the “DIY” versions. This is a plethora of additional potentially useful aquaponics information constituting about 500 printed pages and other digital data. These include the CAD drawing files for the construction plans (to be printed at your local digital print shop); all the slideshows and videos we use to present our live courses with, organic certification applications and information, spreadsheets and business plans, and more. If you do not automatically receive an email from dropbox.com with a clickable link to these folders, please email me (Tim) at training@friendlyaquaponics.com and let me know, we’ll get the link to you right away. Aloha from us.
